GDC: 244889

MSc Fixed and Removable Prosthodontics, 2018
BDS Dentistry, University of Manchester, 2013
Clinical supervisor - University of Manchester,
Prosthodontics Masters Program
Director, Academy for Dentists

Dr Billal is our extremely talented dentist. He has a specific interest in aesthetic and reconstructive dentistry. He produces some of the best porcelain and composite veneers we have ever seen here at Smileworks and also first rate dentures with and without implants. He also treats patients for full mouth rehabilitation including tooth wear procedures. His thorough processes ensure beautiful, consistent and predictable results for our patients. He was even described at a conference (off the record) recently by a colleague as "the most talented dentist this country's seen in a very long while" so needless to say we're extremely happy to have him on the team.

"I had the most amazing reconstruction on my front teeth by Dr Billy, including a flawless colour match to my newly whitened teeth. The treatment I received was incredible and the end results speak for themselves, I have had numerous people within the first week comment on how incredible my tooth look. To all the staff at Smileworks I say thank you so much, you have made me a very happy customer."

DAVID BIRTLES, 2017
